Welcome to Beego Industries

Mr. Prabhu Thiyagarajan with Tender Coconut Machin (TCM) at AGRI INTEC, CODESSIA, Coimbatore 2019

Mr. Prabhu Thiyagarajan, Proprietor of Beego Industries who graduated in computer science and worked for a global IT service company which supports banks and non banking industries. He has gained international experience working with global partners in the IT field. His vision is to manufacture innovative products and automate wherever possible to bring convenience and benefit to the people/companies.

About Tender Coconut Machine:

"The Tender Coconut Machine idea was born when Mr. Prabhu, Proprietor of Beego ordered tender coconut water at a roadside shop. He noticed an old woman who struggled to crack the tender coconut with a piercing tool. It created an embarrassing moment of inability within himself caused by the difficulties the woman was facing. This triggered an idea to come up with a machine which can address the problem of tender coconut shopkeepers."

We built this Tender coconut cutting machine with the vision of changing cutting techniques and to eliminate the risk of shopkeepers who face back ache, hand pain and risk of amputation. We always want to hear the customer's voice all the time to produce even better machines.
